**Subject:** request for support for a CAG

Dear Rebekah,

We would like to request support from Senator Pavley for a CAG Community Advisory Group which we have submitted a petition to DTSC.

We are asking DTSC for assistance in forming a CAG which under Chapter 6.8 of the Health and Safety Code, there is a mechanism to fund this group through the responsible parties. We believe having open representation from all sides of the hill including both the Los Angeles and Ventura County sides. Contrary to the SSFL Workgroup Meetings, we believe that a rotating forum that meets in locations on all sides of the hill will better represent and promote educational outreach to the local communities about relevant clean-up decisions being made that might affect them. We feel that by being inclusive, rather than exclusive, we will provide a more collaborative working environment where all the responsible parties including Boeing can be at the table for discussion and debate about what's right for all of us.

Boeing has committed to funding a CAG and we hope we can count on your support in forming this new group. We look forward to speaking with you more about this and request an opportunity to meet with you in person to discuss pertinent details that we hope will allow us to bridge our common goals and have a more collaborative and transparent process with all views heard and forward motion may continue to plot through the litigative and contentious process we see ahead to clean-up solutions.

Thank you in advance,

Sincerely  
Christina Walsh
